

Embers & Stones

It's a tribute to the history and future of our region. Founded in Dudelange, in the south of Luxembourg, a town shaped by the steel industry, Embers & Stones blends craftsmanship heritage with a clear focus on environmental and social responsibility.

Most of the production takes place in the Ateliers Kraizbierg, a local institution working with people with disabilities, giving them the opportunity to contribute their skills and craftsmanship.

In collaboration with a partner brand that offers stylish and ethically produced clothing, Embers & Stones is committed to both, environmental protection and social responsibility—working towards a more sustainable and just future.
